IV International Meeting for Digital Art History Researchers

[This event is sponsored by HDH (Humanidades Digitales Hispánicas. Sociedad Internacional), CEHA (Comité Español de Historia del Arte) and BBVA Foundation]

iArHis_Lab -research group at the University of Málaga-, in collaboration with ReArte.Dix (Red Internacional de Estudios Digitales sobre la Cultura Artística - Artistic Culture Digital Studies International Network), organizes the IV International Meeting for Digital Art History Researchers on December 15th and 16th 2016 in Málaga, Spain.

This meeting pursues two objectives: gather in a common scenario those research initiatives developed at the intersection between art historical studies, computational technologies and digital media, as well as to develop a sustainable forum to exchange ideas and experiences in the field of digital art history and allied areas.

The meeting, that will host two outstanding researchers from the field -Maximilian Schich (University of Texas) and Alexandra Saum-Pascual (Berkeley University)-, will be articulated in working sessions opened to all those who are interested in presenting their investigations and projects.

Moreover, as part of this meeting a presentation of the results of the Exhibitium Project will be held. Funded by the BBVA Foundation, the Exhibitium Project has been developed during the last two years by the research group iArHis_Lab and other international partners. The objective of the Exhibitium Project is to develop new interpretative models about art exhibitions through the application of data-driven analysis strategies. The main results and conclusions reached during the last two years will be presented and discussed.
