María Marcos Cobaleda

Dialogues in the Late Medieval Mediterranean: Methodological Encounters and (Dis)Encounters  
International Workshop

The aim of this International Workshop is to establish a methodological exchange forum to analyse the panorama of the late medieval Mediterranean from different and complementary perspectives. To achieve this aim, a double objective has been proposed: to create a dialogue space in order to share recent research results, as well as to establish new research networks integrated by senior and young researchers which allow the development of multidisciplinary research lines about the late Middle Ages. Within this general framework, the main goal will be to analyse the Islamic cultural legacy in a comprehensive approach, from the multidisciplinary fields of History of Art, Architecture, History, Literature, Archaeology, Philosophy and History of Religions.
