MEDIEVAL MAPS AND DIAGRAMS

9 MARCH 2012

<http://warburg.sas.ac.uk/events/colloquia-2011-12/medieval-maps-and-diagrams/>

In the past, maps were defined as representations of the surface of the earth or a part of it, but modern cartographical theorists and map historians define maps more widely as forms of graphic representations facilitating 'a spatial understanding of things, concepts, conditions, processes, or events' (J. B. Harley and D. Woodward). This interdisciplinary workshop will explore the relationship between medieval maps and diagrams. Brief presentations (15 minutes each) will concentrate on specific examples, which will be discussed in view of wider topics such as the art of memory, divination, typology, and page layout. The concluding panel will be concerned with the underlying question of the relationship and distinctions between medieval diagrams and maps, with the ways in which they have been examined by scholars in the past, and with how they might be investigated in the future.

PROGRAMME

10.00 Doors Open, Registration

10.15 Peter Mack and Hanna Vorholt, Welcome and Introduction

Chair: Peter Tóth (Warburg Institute)

10.30 Catherine Delano-Smith (Institute of Historical Research, London) - One Image, Several Guises: the Mapping of the Desert Encampment (Numbers 2-3)
