Webresources for Medieval and Renaissance Prints

Editha Nancy Jacobs

Dear List Members,

I am interested in collecting images for a class on Medieval and Renaissance prints. Does anyone know if any printed 15th and 16th Century printed books from Germany, France or Italy can be located on any internet sites? Unfortunately, our libraries here do not house any of these European collections, but my Art History Class still needs to be exposed to this information. Can anyone suggest any ideas to help?
