

El Lissitskii Pavilion 1934

Scott W.

I am seeking information on a pavilion designed for the Soviet government by the avant garde architect Lazar El Lissitskii for display at the Fourteenth International Aviation Exhibition. The Exhibition was held in Paris during the early Fall of 1934.

I have scoured the relevant Russian archives and turned up a few items (including one of Lissitskii's original blueprints) but I have not been able to locate a photograph of the pavilion.

Does anyone who subscribes to H-Arthist know which French archives or repositories might contain photographs of the structure?
