Technical and Design Issues

Standards, Architectures and Protocols

Interface and Design Paradigms

New Tools and Methods

Managing Content and Metadata

Evaluation and User Studies

Results

Methods

Impact Studies

User Analysis and Audience Development

SESSION FORMATS

Different methods of presentation suit particular kinds of content. Museums and the Web includes formal Papers, Demonstrations, Workshops, Mini-Workshops, Professional Fora and other Interactions. Choose the right presentation format for your proposal. Even the best ideas can be rejected if proposed for an inappropriate venue.

See <http://www.archimuse.com/mw2006/sessions/index.html> for details.

PROPOSAL SUBMISSION

Submit your proposal on-line at: <http://www.archimuse.com/mw2006/call.html>

All proposals must cite relevant URLs, explain the thesis of the proposed paper in at least a paragraph, and include full contact details (with e-mail address) for all co-authors.

Please coordinate your proposals with your collaborators. Multiple proposals about the same project will not be accepted. Proposals for sessions should be submitted as individual papers with a covering note. Papers are reviewed individually.

DEADLINE: September 30, 2005.

PROPOSAL REVIEW

The program for MW2006 is selected by a committee of international experts in cultural informatics. All proposals are peer-reviewed. Written papers are required. The best papers appear in print in Museums and the Web 2006: selected papers from an international conference. All papers appear in on-line as part of the MW2006 site and on CD-ROM Proceedings.

Past papers from all Museums and the Web conferences, since 1997, are available on-line. See <http://www.archimuse.com/conferences/mw.html> for links to individual years and to a combined list of speakers.
