This colloquium starts from the assumption that it is possible to reconstruct a history of the art of the second half of the twentieth century through the activity, writings, networks and campaigns of Pierre Restany. Doubtless this will be a partial history, in both senses of the word, and a history that will be distinctly off-centre, at both a geographical and a theoretical level, in relation to other narratives of this period. Going on from there, however, we also have to ask what kind history of art, of modernity, of the avant-gardes and of post modernism the historian maybe able to construct, from the example offered by Restany's career and activity as a critic.

We shall be able, with the help of a range of specialists in twentieth century art and art criticism, to single out the most significant lines of research for evaluating and interpreting the writings and archives assembled by a critic, observer, theorist and highly unusual, active participant in events, who left a lasting mark on the international art scene.

The Colloquium will be held in French and English; it will consist of plenary sessions, mainly in the form of lectures, discussions, testimonies, alternating with five academic sessions, which form the basis for this call for papers.

The proceedings of the colloquium will be published in 2007.

As a contribution to the event, the Archives de la Critique d'Art will offer

special facilities to researchers wishing to work on its holdings of archival material on Pierre Restany. Further details of these will be communicated to interested enquirers.
