EXHIBITION DESCRIPTION:

This exhibition of Japanese Erotic Prints at the Center for Gender Studies is the first public exhibition of Shunga erotic prints in the Midwest. It features a private collection including works by Utamaro, Toyokuni I, Kunisada, and a selection of artists up to war-related erotic prints made in the Meiji period.

Shunga is an important part of the woodblock print production of early modern Japan and various scholars estimate that anywhere from one-fourth to one-fifth of the total production of woodblock prints in that time was erotic in nature. Moreover, it was a genre in which all known woodblock print artists participated. Nevertheless, local public displays of the genre have been non-existent, puzzling especially for a city that prides itself for having one of the world's finest collections of Japanese prints at the Art Institute. This exhibition is an attempt to start making up for this puzzling lacunae. A major aim of the show is to show the various contexts of the prints and will include a special emphasis on the (often ignored) words that usually form an important part of the print designs.

The show will run for a month at the Center of Gender Studies and will be co-curated by the students of Professor Hans Bjarne Thomsen's Winter 2007 woodblock print graduate seminar as a class project.
