

## Convulsive Nursey Surrealism & Childhood Sexuality (Manchester, 10 May 10)

Silvia Loretí

The Convulsive Nursey Surrealism and Childhood Sexuality

Monday May 10th 2010, 10.00-5.00pm (6.00-7.30 keynote)

The Whitworth Art Gallery, University of Manchester

Queer studies and childhood studies have become increasingly intertwined over the last decade. Interest has been concentrated on the late nineteenth century as age of consent legislation coincided with the psychoanalytic investigation of childhood sexuality in the work of Sigmund Freud and others. The neglect of the study of childhood within the history of Surrealism is striking - despite André Breton's assertion, in the first manifesto, that childhood memory was the easiest route into the marvelous. In works by artists and writers as diverse as Hans Bellmer and Dorothea Tanning, Toyen and Max Ernst, or Michel Leiris and Nelly Kaplan - the child is a focus point for a discussion of anxiety, sexuality and the formation of subjectivity itself. This conference will bring together a number of speakers to discuss the issue of childhood and sexuality within both surrealist works and practice that might be seen as part of its legacy.

Co-sponsored by the AHRC funded Centre for the Study of Surrealism and Its Legacies and CIDRA
