

Electronic Media & Visual Arts (Berlin, 10-12 Nov 10)

Matthias Bruhn

Electronic Media & Visual Arts (EVA), Berlin 2010
November 10-12

CALL FOR PAPERS

Cross-media communication, multimodal interaction and mobile web-technologies allow for interrelated access to the digital heritage beyond the institutional limits of traditional museums, libraries and archives. This is challenging traditional concepts of precisely separated institutions. Large digital repositories, represented in a kind of "splendid isolation" of single memory institutions, have to open access to the more coherent and broader context of a globalized culture.

The 17th Berlin EVA conference offers a discussion forum of new media applications. It brings together the memory institutions with researchers of the information and communication technologies, IT - specialists and the public administration sector. Results of research and development will be presented with a strong reference to their usage. A particular "students' day" refers to innovative positions from the academic educational sector. As a member of the international EVA Conferences Network this event offers opportunities for international co-operation.

Conference Languages: German & English

LOCATION

Kulturforum Potsdamer Platz
Kunstgewerbemuseum
Matthäikirchplatz 8
10785 Berlin

Key aspects will be:

- Culture & technology: future trends & perspectives
