Synesthesia and Kinaesthetics - Third conference in the series Habitus in Habitat

This conference will address Synesthesia and Kinaesthetics as two key concepts for the understanding of the interface of habitat and experience, of engaging, presenting and perceiving phenomena of habitus as a component of a shared environment. Synesthesia and Kinaesthetics will strive to engage questions of sensual embedded interaction and their habituations – and moreover it will expand this interdisciplinary inquiry to questions about the sociality and the cultures of sensory habitus.
