Digital Art History IV (Zagreb, 3-4 Oct 22)

Zagreb, Croatia, Oct 3-04, 2022 Deadline: Jul 1, 2022

Sanja Sekelj, Institute of Art History Zagreb

!!! NEW EXTENDED DEADLINE !!!

International Conference Digital Art History - Methods, Practices, Epistemologies IV

Subject Fields: Digital Art History, Digital History of Architecture, Digital Visual Culture Studies, Critical Digital Cultural Heritage

Keynote speakers:

Prof. Dr. Maximilian Schich, ERA Chair for Cultural Data Analytics at Tallinn University Prof. Dr. Hubertus Kohle, Institut für Kunstgeschichte, Ludwig-Maximilians-Universität, Munich

Conference organizers: Institute of Art History, Zagreb; SRCE – University of Zagreb, University Computing Centre; University of Ljubljana, Academy of Fine Arts and Design; DARIAH-HR; National and University Library in Zagreb

The fourth edition of the conference Digital Art History – Methods, Practices, Epistemologies will bring together established and early career scholars, independent researchers, and professionals involved with the transdisciplinary research in Digital Humanities, focusing on Digital Art History, Digital Visual Studies, Digital History of Architecture, and Critical Digital Cultural Heritage.

The annual series of conferences Digital Art History – Methods, Practices, Epistemologies was conceived in 2018 with a mission to promote and discuss the "digital turn" in humanities, and to become an inclusive and open platform for exchange, networking and learning about ongoing research, projects and diverse type of practices in the field of Digital Art History / Digital Humanities. Since then, the scope and physiognomy of this transdisciplinary field itself has grown larger, more diverse and complex. Therefore, this years' conference will try to provide a compelling theoretical angle and entice more focused discussions, particularly welcoming those that aim at theoretical elaborations and methodological contributions to the study of complexity in art historical phenomena and processes.

The field of cultural production can be regarded as a complex system, composed of human and non-human agents, whose defining feature is that of emergence (meaning that an entity possesses properties not present in any of its parts). The agents that make up the cultural field – whether it be artists, artworks, institutions, ideas or market mechanisms and socio-political frameworks – are in constant interaction: they continuously adapt to each other, develop different and differing strategies and models of functioning, keeping the field permeable to the entry of new agents who,

ArtHist.net

in turn, contribute to the change of the entire system. On the practical level of methods and analys-

es, these agents and their interactions are commonly situated within a spatial, temporal or spa-

tio-temporal epistemic and analytical grid.

On the level of spatial relations, the described complexity of the cultural/artistic field can be best

observed on the micro-level, but is further complicated when we consider it on a global scale,

through the consequences of far-reaching political events, the operation of transnational agents

or the circulation of artists, ideas, and objects. On the other hand, the functioning of the art field

as a complex system brings into question the idea of linear / chronological flows of dominant cul-

tural narratives, since - in mathematical terms - the described interactions are already non-lin-

ear.

Along with presentations that deal with global cultural exchange / circulation, and plural spa-

tio-temporal regimes, we are especially interested in how these complexities are (or can be)

addressed in digital research projects, i.e. how these complex processes are framed in relation to

the limitations of digital tools, visualization techniques and data sources.

However, due to continual lack of scholarly meeting points focused on Digital Art History, we are

open to all other contributions presenting ongoing or recently completed research projects, unpub-

lished discussions concerning the wider scope of methodological, theoretical, and epistemologi-

cal issues of Digital Art History / Digital Humanities, as well as papers focusing on the technologi-

cal problems and solutions of interest to a wider research community.

To apply for a 20-minute presentation please submit an abstract (500 words max.) and a brief bio-

graphical note (200 words max.) to mbobinac@ipu.hr. In the biographical note please clearly indi-

cate your institutional affiliation (if any). We accept submissions on completed, original and

unpublished results, as well as contributions that present work in progress.

EXTENDED DEADLINE:

Submission deadline: July 1, 2022

Notification of Acceptance: July 11, 2022

The participation in the conference is free and open to everyone, with no registration fees.

Selected papers will be invited to prepare a submission for an edited, peer-reviewed volume.

The conference and the publication are organized within the research project J7-2606 "Models

and Practices of Global Cultural Exchange and Non-Aligned Movement. Research in the Spa-

tio-Temporal Cultural Dynamics," which is conducted by the University of Ljubljana, Academy of

Fine Arts and Design, and the Institute of Art History in Zagreb. The project is funded by the Slove-

nian Research Agency (ARRS) and the Croatian Science Foundation (HRZZ). For more information

please visit: https://www.nam-globe-exchange.org/.
