Leaving the Studio and Participatory Art. Around Władysław Hasior's Work

The Tatra Museum (and the Władysław Hasior Gallery in particular), is planning to organize on November 24-25, 2022, the conference "Leaving the Studio and Participatory Art. Around Władysław Hasior's Work". The organizers would like to look at Hasior's work from the present day perspective.

In the context of the November conference at Hasior's Gallery, we are interested in taking new interpretative paths through the prism of participation in relation to, for example, affects, the spatial turn, new materialism, post-secularism, and in the context of other artists, both Hasior's contemporaries and those working today.
