

## Surrealism in the Nordic Countries (Stockholm, 5–6 May 23)

Moderna Museet, Stockholm, May 5–06, 2023

Kristoffer Noheden

What is the significance of surrealism in the Nordic countries? When does surrealism take shape in the region and what does it look like? How is surrealism received and what role does it play in different national cultures? In this symposium, scholars and curators present a range of different answers to those questions. Delving into topics from Paris-bound painter Greta Knutson-Tzara, to situationists approaching surrealism, to collage and comics, the papers approach surrealism in the Nordic countries as a rich and diverse phenomenon with surprising longevity.

In 1930s Denmark, painters gravitated around the journal *Linien* to promote surrealism, and the 1935 exhibition *Kubisme=Surrealisme* brought international surrealism to Copenhagen. In 1930s Sweden, the Halmstad Group rose to both national and international prominence, and later surrealist initiatives include the artist group the Imaginists formed in the late 1940s and the Surrealist Group of Stockholm with a start in the 1980s. In Iceland surrealism only took hold in the 1960s and was radicalized by the young *Médusa* group a decade later. And in Norway and Finland, surrealism has never taken the form of a movement, but has rather been an influence on a diverse cast of poets and painters.

This symposium on surrealism in the Nordic countries excavates these tendencies and presents new perspectives on artists, writers, collectors, and exhibitions.

### PROGRAMME

Friday 5 May

10.30 Introduction

10.45–12.30 PANEL 1 – Exploring and Exhibiting Surrealism in Sweden
