V&A South Kensington, London / online, Nov 14, 2024

Registration deadline: Nov 14, 2024

Pandora Syperek, LONDON

Animal Products: Transhistorical Intersections of More-Than-Human Design and Display.

This symposium brings together artists, designers, curators and researchers to explore the interrelationships between 'products' made from, by and with nonhuman animals and their contexts of display. Taking the V&A's historical Collection of Animal Products as a point of departure, speakers will explore the natural-cultural histories of animal materials alongside innovative contemporary approaches to making, designing and curating with the more-than-human in diverse contexts. Researchers and practitioners will consider legacies of colonial extraction, collection, trade, knowledge transfer and display, both in the wild and in the museum. The aim is to look beyond the Victorian paradigm of animal-as-product and its Eurocentric legacies, including traditional sustainability discourse, to explore interspecies relationships across art, design, curatorial practice, ecology and cosmologies.
