

## The World at a Glance. Panoramic and Peep Technologies (Lisbon, 2–4 Jul 25)

Lisbon, Calouste Gulbenkian Foundation, Jul 2–04, 2025

Deadline: Jan 27, 2025

Susana Martins

"The World at a Glance — Panoramic and Peep Technologies".  
34th International Panorama Council Conference.

The International Panorama Council together with Lusofona University Early Visual Media Lab and the Art History Institute (IHA, NOVA-FCSH/IN2PAST) invite scholars, artists, panorama enthusiasts and visual media researchers to submit proposals for presentations that explore the theme "The World at a Glance. Panoramic and Peep Technologies." This recasting of Robert Barker's original title for his invention (1787), "Nature at a Glance" (in French, "La Nature à Coup d' Oeil"), will explore the modern desire to experience the world visually through panoramic or peep technologies and to embark in virtual travels. Panoramas and panoramic imagery shared these early immersive experiences with (itinerant) peepshows, cosmoramas, neoramas, dioramas, and, among others, in the domestic space, zograscope, stereoscopic photography, graphoscopes and polyoramas. These theatres of visibility were key achievements in art, education and science, fostering visual curiosity and new skills of looking. Either engaging a distant or a proximate gaze, requiring lenses or a specific vantage point on a viewing platform, these technologies made the world in all its aspects admirable and available at a glance. In addition to challenging the visual sensorium, panoramic and peep technologies often intersected and mobilized a synesthetic universe. By exploring their coexistence and intermediality, new light will be shed on the visual cultures and worldviews they promoted.

We welcome proposals for field reports, creative presentations, media presentations, and scholarly papers of up to 20 minutes in length that focus on panoramic or/and peep technologies, their specificities, intermedialities, socio-cultural and political roles, as well as their current digital and virtual cultures, and their conservation, display and mediation challenges.

The IPC conference will present a diverse range of session topics based on the proposals, as well as workshops, round tables and visits. It will be of interest to academics, professionals, students and enthusiasts of art, visual media, art history, conservation and preservation, cultural heritage, design, history, museum practice, panorama management, restoration, virtual reality, and visual culture, as well as to thinkers and makers from other disciplines or whose work is transdisciplinary with an interest in immersive and peep media, media archaeology or any other related field.

Proposals must be in Microsoft Word (.docx) format and include:

Title of the presentation

Author's name, affiliation, complete mailing address and email

300-word abstract

Author's biography (150–200 words)

3–5 Keywords

Deadline for proposal submission: January 27, 2025

Please submit all abstracts and queries related to submissions to  
[secretariat@panoramacouncil.org](mailto:secretariat@panoramacouncil.org)

The conference will take place July 2–4, 2025, with an optional post-conference excursion on July 5.

For more information about the International Panorama Council and the Conference, please visit
