

Stucco Decoration across Europe Lecture Series (online, 6–24 Mar 25)

Online, 06.–24.03.2025

Giacinta Jean, SUPSI

Stucco Decoration across Europe.

The project aims at creating an international interdisciplinary network of specialists in study and preservation of precious stucco decorations which are irreversibly damaged by inexpert restoration all over Europe. Partners transfer the shared innovative know-how into practice and university lecturing in order to train a new generation of specialists, educated in an interdisciplinary way, who will get over the current field isolation and will preserve the common European cultural heritage. Partners from four countries (CZ, CH, PL, IT), specialising in stuccos, perform a wide range of scholarly, teaching and dissemination activities to share the new and innovative research findings on materials, techniques and proper restoration work on stucco decorations.
