

Language of Kuancai: Understanding Coromandel Screens (online, 12 Jul 25)

Hong Kong, Jul 12, 2025

Lianming Wang

Language of Kuancai: Understanding Coromandel Screens Through Conservation Science.

Bei Shan Tang Foundation is delighted to present the fourth episode of the Bei Shan Tang Conservation Seminar Series (the "Seminar"). The Seminar invites conservation experts and scholars from around the world to share the latest theories, research, and trends in conservation, promoting the understanding of culture, ethics, and values behind the conservation of Chinese art and artefacts.

Join us for this year's Seminar, "Language of Kuancai: Understanding Coromandel Screens Through Conservation Science," which addresses the need to understand and conserve Coromandel (kuancai) screens. This unique category of Chinese lacquerware has evolved through rich historical traditions and cultural exchanges. The Seminar will feature the latest collaborative conservation research of conservators and scholars from China, Russia, Portugal, and the United States. Our objective is to bridge knowledge gaps and facilitate collaborations among conservation experts, museum professionals, and art historians, emphasizing the profound impact of scientific research on advancing scholarship in art history study.

ZOOM Webinar

Hong Kong / Beijing | July 12, 2025 (Sat) 2pm - 5:30pm
