

## Survey: Chicago-focused projects

Sara Jatcko

Call for information about Chicago-focused research

For an initiative currently in the developmental phase, the Terra Foundation for American Art is conducting an informal survey to learn about research projects now underway or recently completed on any aspect of the history of art, design, and visual culture in Chicago. To assess the state of Chicago art studies, the foundation welcomes information from individuals working in this area. If you are willing to share your research topic with us, please provide a brief description of it, information about the final form the project will take, if known (e.g., an exhibition, dissertation, paper, journal article, book, etc.), the anticipated completion date, and your contact information. Please also let us know whether or not you are willing to share your information with other interested scholars. If not, the Foundation will keep your project confidential.
