

## The Territories of Artists' Periodicals (Green Bay, 2-6 Jun 14)

### The Territories of Artists' Periodicals

This symposium seeks to provide a venue for dialogue between researchers, artists, publishers, archivists, librarians and others interested in artists' periodicals in order to bring into focus the many issues and themes that constitute the terrain of these publications. We have chosen the 1950s as the starting date for this symposium as we believe this decade is the crucial moment in which artists' periodicals develop as a distinct and identifiable medium.

The key development that defines the periodicals under discussion is the observation that artists' periodicals move beyond their predecessors' roles as sites for the reproduction of texts and images, to one in which they begin to function as primary sites for the production of artworks.

Over the span of this 3-day symposium, coupled with hands-on access to a substantial collection of artists' periodicals, we hope to engage with a number of different questions related to why artists choose the medium of the periodical for their creative expression, what are the constituent features of this medium and how these issues relate to the larger field of artists' printed matter, the contemporary art scene, and the broader publishing world. Other topics include the nature and mode of reception of these publications, the activation of the reader's role as participant/collaborator, the questioning of the institution of the editor, the different strategies through which the contents of artists' periodicals are generated, and finally the influence of the new digital environment on the production, distribution, conservation and archiving of these periodicals.
